

2026 Product Catalog

Bring something spectacular to the table.

American Metalcraft brings innovation and style to every corner of the food service world—whether you run a restaurant, manage a grocery deli, handle hotel operations, or cater off-site events. Every piece is designed to handle daily use while making your food look its best, because the small details are what guests notice. From barware to buffetware, the focus is on smart features, durable construction, and styles that feel current without being complicated.

The company started over seventy-five years ago with a simple, practical idea: turning hubcaps into deep-dish pizza pans and custom plate covers for busy kitchens. That same problem-solving mindset now drives a wide range of products that support prep, service, and presentation across the entire operation. In this catalog, you'll find tabletop essentials, back-of-house tools, and new buffet technology that help streamline service and create a better, more memorable dining experience for your guests. **It all boils down to this: Great food deserves great presentation.**

PRODUCTS CUSTOMIZED FOR YOUR SPECIFIC NEEDS

When you require more than standard solutions, American Metalcraft steps in to help. Our product development team specializes in turning challenges into custom-designed solutions—whether that means adjusting dimensions, addressing operational hurdles, or developing something entirely new.

We also bring customization to life with decoration options on wood, glass, metal, Tritan, and more—so every product reflects your brand and your vision. With reasonable minimums and quick turnaround times, we make custom decoration easy.

Let's collaborate to turn your challenges into results and ensure the final product is uniquely yours. Please call **800.333.9133** or email info@amnow.com for a quotation.

Dinnerware

Designed for the demands of foodservice, delivering the durability operators need with the style guests remember.

THE UNITY COLLECTION

Finally, a contemporary take on melamine dinnerware that provides the ultimate canvas for today's modern cuisine: the Unity Collection. Named for the intersection of form and function, the Unity Collection combines a clean, straight-sided and stackable design with the durability of melamine. The result is delectably inspiring.

Available in a wide variety of shapes, sizes, and capacities, this dual-toned collection features colorways to approach both the coolest and warmest of decors. Intermix the graphite and mocha colors together, add a splash of stainless and a touch of Tritan™ and your recipe is complete. The look is truly extraordinary.

THE MIX & MATTE COLLECTION

When laid-back presentation won't cut it, our Mix & Matte Collection of melamine dinnerware lends an air of luxury. Designed to be mixed and matched, these matte pieces can stand up to even the noblest menu items.

Each piece in the collection is made to work together, giving you simple, flexible styling options. Layer plates, bowls, and platters for a dimensional, curated look, or mix shapes and sizes to create a presentation that feels elevated yet effortless. Crafted from durable melamine, this line is resilient to the bumps, bangs, and bounces of a busy kitchen. It delivers the look of premium dinnerware with the practicality needed for everyday service—versatile, stylish, and ready to shine in any setting.

THE CRAVE COLLECTION

Our Crave Collection of break-resistant melamine dinnerware is back and bigger than ever. In a wide variety of plates, platters, bowls and mugs, this is not your grandma's melamine. Fast forward, rather, to the 21st century, where technological advancements in designs, materials, and manufacturing techniques create artisan-quality melamine that captures the look and feel of china—all at a fraction of the cost and two to three times the service life.

NSF-certified and BPA-free, the Crave Collection is safe in terms of durability, design, and ability to be thoroughly sanitized. In two base colors and additional color options, each artisanally designed piece features organic edges to elevate foodservice everywhere.

THE JANE COLLECTION

Dinnerware has a new standard. The Jane Collection, our “basic” dinnerware line, is anything but ordinary. Simple and versatile by design, these plates, bowls, cups, platters and even sauce cups serve as ideal backdrops for all types of menu items. From low-key lunches to gastronomically-inspired dinners, the possibilities are practically endless.

We chose to craft the Jane Collection from melamine for two reasons: First, it's exceptionally resilient to the bumps, bangs and bounces that find their way into every kitchen. This dinnerware is in it for the long haul. Second, melamine is dishwasher-safe. No matter how you're inspired to fill these blank canvases, cleaning and reusing them is a cinch.

STANDARD STOCKED PLATE COVERS

Need to please a crowd in a pinch? Our most popular plate covers are now available for rapid turnaround. Made of durable satin-finished stainless steel, these covers feature top-of-the-line heat retention and odor resistance. A well in the top of each cover fits the foot of many different plates. Just measure the diameter of the plate and note the design of the foot to determine the best option. We can also help guide you to the right cover choice with key details about the plate (manufacturer, model and/or size) or by sending a sample plate. All covers are 2" in height and include a finger hole. For help ordering, call 800-333-9133 or email platecovers@amnow.com.

The BuffetBoost™ Collection

Elevate your buffet with sleek warming solutions that combine portability, performance, and presentation.

PORTABLE HEAT ANYWHERE WITH THE BUFFETBOOST COLLECTION

The BuffetBoost Collection brings warmth to every table, power to every presentation, and freedom to every chef. This versatile collection of portable heating solutions is designed for group dining events of any size. At its heart is a high-performance, rechargeable lithium-ion battery that powers all devices, giving you the freedom to serve without limits. Each unit can also run continuously via AC power and features an intuitive LED control panel to monitor battery life or power mode at a glance. Removable batteries and optional charging trays allow you to plan for extended events with ease. Sleek, modern designs ensure every BuffetBoost device complements your presentation, combining professional performance with effortless style. With BuffetBoost, you're not just serving food—you're creating an elevated buffet experience.

BuffetBoost Lithium-Ion Battery

At the core of the BuffetBoost Collection is our high-performance lithium-ion battery, designed for compatibility across all BuffetBoost products. The assortment includes versatile charging and power accessories that simplify setup and mobility—from buildable charging trays to the flexible PowerPack (sold separately on pg. 165). Wherever your culinary vision travels, the BuffetBoost Battery keeps the energy flowing.

UNPLUG AND TURN UP THE HEAT WITH THE BUFFETBOOST LUMALAMP

Illuminate your culinary display with warmth and style. The BuffetBoost LumaLamp combines elegant design with powerful performance, delivering precise, consistent heat for every presentation. Use the included AC adapter/charger for continuous operation, or switch to our rechargeable lithium-ion batteries (sold separately) for cordless service. With its sleek silhouette and dual power flexibility, LumaLamp transforms any buffet or event into a radiant, professional display.

BuffetBoost LumaLamp  

Elevate your buffet presentation with the versatile BuffetBoost LumaLamp. Its sleek black metal design, flexible serpentine arm, and swivel lampshade let you direct heat exactly where it's needed, while the weighted base provides reliable stability for freestanding use. Equipped with two 70W shatterproof halogen bulbs, LumaLamp delivers fast, consistent heat and a warm glow to showcase your culinary creations. Operate via the included AC adapter or with the portable BuffetBoost Lithium-Ion Battery, and extend run time by connecting to the PowerPack (each sold separately). Durable, stylish, and performance-driven, LumaLamp is a professional, portable solution for any buffet setup.

Pizza Pans & Supplies

Trusted by operators for decades, our pizza pans and supplies combine proven performance with lasting durability for consistent, reliable results.

A Guide to our Pizza Pans

ALUMINUM (A/HA)

Aluminum Pans

Aluminum is an excellent conductor of heat, providing evenly baked crusts.

Standard-weight pans (denoted with "A" at the beginning of the item number) are made from 18-ga., 0.040", 1 mm aluminum.

Heavy-weight pans (denoted with "HA" at the beginning of the item number) are made from 14-ga., 0.064", 1.5 mm aluminum and are 50% heavier than standard-weight.

- Hand washing with aluminum-safe detergent is recommended.
- Through repeated use, pans will soften and, if scoured, will thin.

HARD COAT ANODIZED (HC)

Hard Coat Anodized Pans

Heavy-weight and durable, hard coat aluminum provides quick and efficient results.

Hard coat pans (denoted with "HC" at the beginning or end of the item number) are anodized with a synergistic electro-chemical process that converts the surface of aluminum into a dark aluminum oxide.

- Made from heavy-weight aluminum (unless perforated, in which case they're made from standard-weight aluminum).
- Through repeated use, pans will soften and, if scoured, will thin.
- Season before use and hand wash with aluminum-safe detergent.*

EZ RELEASE (EZ)

EZ Release Pans NEW

Dark, smooth and durable, EZ Release aluminum offers the benefits of hard coat anodizing with a low-friction finish for superior dough release.

EZ Release pans (denoted with a "EZ" at the beginning of the item number) are pre-treated with an advanced application that smooths the aluminum surface before it is anodized with a synergistic electro-chemical process that darkens the color. The result is a pan with easy dough release and the most efficient baking times—the best option for quick turnaround times in busy kitchens.

- Made from heavy-weight aluminum (unless perforated, in which case they're made from standard-weight aluminum).
- Through repeated use, pans will soften and, if scoured, will thin.
- Season before use for best results and hand wash with aluminum-safe detergent.*

*How to Season and Care for Hard Coat/EZ Release Pans

Wash and dry the pan thoroughly. Wipe oil on the inside and outside surfaces of the pan and allow to soak in for 30 minutes. Then bake at regular cooking times and temperatures. Do not overbake and do not wash off excess oil. The oil residue and any additional oil added before baking allows the pan to develop non-stick properties. Remember when cleaning hard anodized aluminum, this is considered an amphoteric coating and will be attacked by solutions of a high-alkaline or acidic nature. Do not expose these pans to dishwashers or caustic cleaning solutions. Hand wash with detergents made specifically for aluminum.

USA Proudly Manufactured in the United States of America

For over 75 years American Metalcraft has been producing pizza pans and trays in our facility located right outside of Chicago, Illinois. We are proud to still manufacture American-made quality products by employing local workers. When you see this symbol , rest assured the product is made in America.

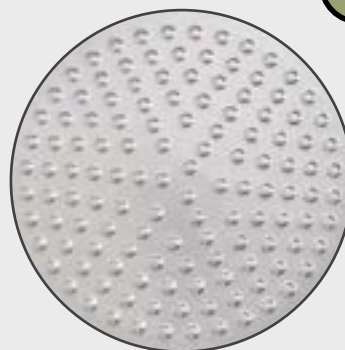

We carry thousands of different pizza trays in varying styles, depths, materials and other options, resulting in tens of thousands of possible combinations. Please note that unless otherwise noted, all pan and tray dimensions are measured from the inner diameter. Because each pan is made to order, it's possible that yours is the first of its kind. **Made-to-order pans cannot be cancelled or returned, so please review and re-confirm your order.** If you have any questions, give us a call and, if necessary, request a sample.

Nibs (N)

Nibs raise the pizza from its baking surface, allowing moisture to escape providing a fresher, crispier pizza.

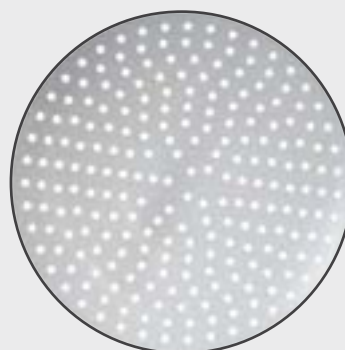

- Nibs are approximately 5/8" (15.9 mm) in diameter and raise the pizza about 1/8" (3.2 mm) above the surface of the pan.
- Any round or square pizza trays or pans measuring 2" (5.1 cm) deep or less, or between 8" (20.3 cm) and 20" (50.8 cm), can be made with nibs.
- Pans with nibs cannot be perforated.
- To order, add "N" to the beginning of the regular item number and note in the body of the order that the pans should be made with nibs.
- Refer to price list or amnow.com for pricing information.

Perf (P)

Perforated pans allow the bottom of the pizza to cook faster and can provide a crispier crust. They can also keep cooked pizzas fresher by allowing moisture to escape.

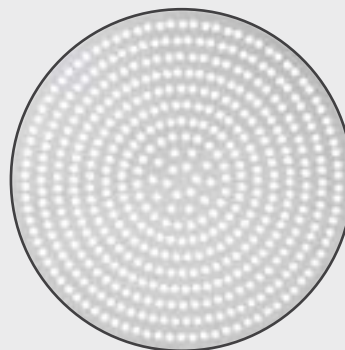

- Holes are 3/8" (9.5 mm) in diameter.
- Round or square pizza trays or pans less than 21" (53.3 cm) in diameter can be perforated.
- Perf pans cannot be made with nibs.
- To order, add "P" to the beginning or end of the regular item number and note in the body of the order that the pans should be perforated.
- Refer to price list or amnow.com for pricing information.

SuperPerf (SP)

SuperPerf pans have twice as many holes as Perf pans, allowing the bottom of the pizza to cook faster and providing a crispier crust. They can also keep cooked pizzas fresher by allowing moisture to escape.

- Holes are 3/8" (9.5 mm) in diameter.
- Round pans less than 21" (53.3 cm) in diameter can be SuperPerf.
- SuperPerf pans cannot be made with nibs.
- To order, add "SP" to the end of the regular item number and note in the body of the order that the pans should be SuperPerf.
- Refer to price list or amnow.com for pricing information.

Caring for Wood Peels

Want to keep your wood peel looking fresh? Always wipe it clean with a damp cloth. Never put in dishwasher, soak in water, place under a heat lamp or leave on a hot surface. If your peel warps, leave it with the warp facing up overnight and it should flatten out.

CARE AND USE

Melamine Dinnerware and Serveware

Melamine is extremely durable when cared for properly. It is not recommended for microwave use and should be washed only in a high-temperature dishwasher. Avoid using it with heat lamps or in the oven as melamine will melt in high heat. For serving suggestions, we advise against direct contact with citric, acidic, or strongly colored foods. These may cause staining over time.

Wrought Iron Griddles

Prior to use, wash griddle by hand with warm water and a mild detergent. Dry it thoroughly with a soft cloth. Do not place wrought iron griddles in the dishwasher or expose them to abrasive sponges, caustic cleaners, or acidic detergents.

Wood Products

To clean wood peels, serving and cutting boards and platters, simply wipe with a damp cloth and allow them to air dry. Never soak in water, even if only for a short time.

To seal, apply a thin coat of any food-safe oil, such as mineral oil. When properly sealed, the wood is less likely to absorb unwanted odors, food particles, or moisture. If a peel or board becomes warped, place it overnight with the warped side facing up to flatten out.

Carbon and Black Steel Fry and Paella Pans

Seasoning is recommended before first use. To season, wipe interior of pan with flavorless cooking oil and heat empty pan. When surface becomes hot, remove from heat and allow pan to cool. Repeat this process twice. Color of pan will change to a darker finish. This indicates that the pan has gained a natural non-stick protection.

To clean, hand wash in hot water with mild detergent. Dry with paper towel or place in warm oven for a few minutes. Re-season the pan when necessary to prevent food from sticking. Store in dry place. Do not put in dishwasher or expose to abrasive sponges or acidic detergents. Not suitable for microwave.

CAUTION: Handles are not heat-resistant.

Galvanized Pails and Tubs

To clean, hand wash in warm water with mild detergent and dry quickly. Do not put in dishwasher or expose to abrasive sponges, bristles, caustic cleaners or acidic detergents. Do not refrigerate, soak in water or use with acidic foods.

Hammered Copper

As beautiful as copper is, it requires special attention when cleaning. Please hand wash only with a soft cloth. Do not scour with steel wool or abrasive cleaners. Copper polish may be required to maintain the beauty of the surface.

Securit Signs

To erase Securit Original Chalk Marker messages on Table Boards, Mini Chalkboards, Wall Boards, Sandwich Boards, and other Securit signage, wipe with a soapy cloth followed by a clean cloth.

Acrylic Display Cases

To clean the acrylic, use a soft, lint-free microfiber cloth and avoid abrasive materials like scouring pads, rough towels, or brushes, which can scratch the surface. Refrain from using harsh chemicals—including ammonia, bleach, or solvent-based cleaners—as they may cause clouding, cracking, or discoloration. Keep sharp objects away to prevent damage, and avoid placing extremely hot items directly on the acrylic, since high temperatures can warp or melt the material.

BuffetBoost Collection

After use, turn off the device and allow it to cool completely before cleaning. Wipe the surface lightly with a damp cloth and a mild, diluted detergent as needed, taking care to avoid high-alkaline cleaners, dishwashers, or submerging the unit in water or other liquids. For lithium-ion battery use, remove the battery before storing the device, recharge it after each use, and avoid leaving it fully drained. If the battery will be stored for an extended period, charge it every three months and ensure charging occurs in temperatures between 40°F and 100°F. See amnow.com for additional instructions on each device.

Cast Iron

Before first use, hand wash the pan and dry it immediately. Rub it with a thin, light coat of vegetable oil to restore its sheen. After initial use, wash the pan with hot water and a mild soap if necessary. Dry it immediately and apply a light coat of vegetable oil. To remove excess residue, use boiling water along with a plastic scrub pad or brush. Avoid dishwashing, acidic detergents, and scouring pads or bristles, as they can damage the surface. Re-season the pan as needed to prevent food from sticking.

For daily care, never pour cold water into a hot cast iron pan, as this may cause it to crack or warp. Store the cookware in a cool, dry place. When using gas burners, ensure the flame does not extend up the sides of the pan. During deep frying, fill the cookware only up to one-third of its capacity.

Aluminum Pans, Trays and Peels

Aluminum is a soft metal that is damaged by detergents with a high alkaline or acidic nature. Use detergents made specifically for aluminum. Through repeated use, aluminum will soften and, if scoured, will thin. Hand wash only using mild detergent made specifically for aluminum. Do not put in the dishwasher.

Hard Coat Pans and Trays

These pans are made from heavy-weight aluminum. Hard coat anodizing is a synergistic electro-chemical process that converts the surface of aluminum into aluminum oxide. The aluminum oxide is a dark color. The finish is hard and will not flake off. However, the aluminum underneath is soft and, through repeated use, the pan will soften. If scoured, the pan will thin. Hard coat pans are not non-stick and must be seasoned (see below). Do not put these pans in dishwashers or expose them to caustic cleaning solutions. Hand wash only using mild detergent made specifically for aluminum.

EZ Release Pans and Trays

EZ Release pans are pre-treated with an advanced application that smooths the aluminum surface before it is anodized with a synergistic electro-chemical process that darkens the color. The surface not flake or chip. However, aluminum is a soft material, and through repeated use, the pan will soften. Do not scour--the pan will thin. EZ Release pans provide superior dough release but they are not non-stick and we suggest seasoning before use (see below). Do not put these pans in dishwashers or expose them to caustic cleaning solutions. Hand wash only using mild detergent made specifically for aluminum.

How to Season Hard Coat/EZ Release Pans and Trays

Wash and dry the pan thoroughly. Wipe oil on the inside and outside surfaces of the pan and allow to soak in for 30 minutes. Then bake at regular cooking times and temperatures. Do not overbake and do not wash off excess oil. The oil residue and any additional oil added before baking allows the pan to develop non-stick properties.

Pizza Stones

Pizza stones are freezer-, microwave- and oven-safe. However, they are not dishwasher-safe and require hand washing. Simply rinse in warm water before first use and allow the stone to dry thoroughly. It is recommended to preheat the stone 15-20 minutes for even cooking and to reduce baking time. To prevent cracking, avoid moving the stone between extreme temperatures such as from an oven to cold water. Allow the stone to cool completely before cleaning. To avoid a soapy aftertaste, do not use soap or detergents while cleaning. Simply remove baked-on foods and rinse in warm water. Do not soak or put in a dishwasher. Most stones will darken gradually and retain some staining with use. This is part of the stone's natural seasoning and will not affect the taste of the food. Handle each stone with care to prevent chipping or breaking.
