Lead Free* Water Connector Solutions

Dormont Hi-PSI® Flex water connectors provide long, trouble-free service life, and permit quick, safe connection of hot and cold water service lines to moveable/castered and stationary food service equipment. Listed to NSF, these water connectors are composed of a stainless steel corrugated tube covered with a tight weave stainless steel braid. An optional gray PVC antimicrobial coating prevents the growth of bacteria, mold, and mildew.

Water Connectors

Applications:

Utility distribution systems, steam kettles, steamers, ice machines

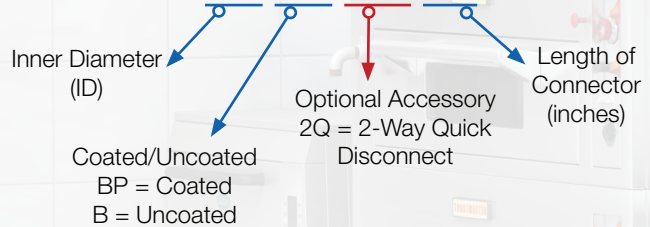

- Stainless steel corrugated hose with braid
- 150 PSI maximum; hot water temperatures up to 225°F (107°C)
- NSF Listed to NSF/ANSI 169 and NSF/ANSI 372
- Available with PVC Coating or without

Flexible design

Dormont Swirl Hose

The Dormont Lead Free* Swirl Hose quickly and easily connects water-fed appliances and equipment to the water supply line, making it easy to move equipment for cleaning without disconnecting the water supply. The flexible design of the swirl hose easily extends and retracts without damage.

Applications:

Ice machines, beverage equipment, coffee brewers, steamers, and more.

- Made of durable, retractable, NSF-certified polyurethane
- Will not kink or crack like ordinary copper tubing
- NSF Listed to NSF/ANSI 169 and NSF/ANSI 372
- Available with Double Shut-off Quick Disconnect
