SPECIAL ISSUE

## Legion's Multi-Functional Skittle® Cooker: Jack of 'Seven' Trades . . . Master of All

*The insulated, multi-function Skittle cooker by Legion Industries is an innovative piece of equipment that really can do it all. The versatility of having a **boilerless steamer, tilting skillet, griddle, fryer, kettle, roaster and holding cabinet** all in one provides more flexibility and menu variety than is possible with any single-function piece of equipment.*

The Skittle's advantages are numerous...

### SAVE SPACE AND SAVE MONEY

The Skittle does it all. It's like buying one piece of equipment and getting others free!

### LOW MAINTENANCE... TROUBLE-FREE

The Skittle features 100% front access for easy servicing. All electrical components can be reached from the front. There is no boiler maintenance – no delimiting or de-scaling

### SAFETY

With the legendary Legion insulation feature, the Skittle's exterior stays cool to the touch. And with its unique capsule lid that lifts up and back there is no steam in your face.

### DURABILITY

The Skittle is built to last with all stainless construction and welded seams.

### FLEXIBILITY

You can use the Skittle for almost anything. Users call it the best and easiest-to-use boilerless steamer on the market, an excellent griddle, a superb backup fryer; and more! It's easily the most versatile piece of equipment you'll ever find.

### EASY TO CLEAN

No unit is easier to clean than the Skittle. There are no cracks, crevices or fasteners to hold debris or bacteria. You simply wash down the unit, rinse with the attached spray hose, and drain away the waste water through the draw off.

**HACCP** compliant, the Skittle is available in gas, electric or direct steam models in 11 different sizes and two lid heights.

## Our Combi-Pan® Tilting Skillet is Multi-Functional, Too!

When menu flexibility is required but steaming needs are limited, consider Legion's Combi-Pan Tilting Skillet. Like the Skittle, the Combi-Pan serves many purposes in the busy kitchen – including boilerless steamer; tilt skillet, fryer; griddle, kettle and holding cabinet.

No one knows skillets better than Legion. We introduced the first tilting skillet – boilerless steamer – to the United States in 1961.

Looking for unsurpassed quality, safety, durability and flexibility? Look no more. Legion has exactly what you need.
