DOUGH MIXERS

FORK MIXERS

Designed specifically with pizza and bakery applications, Marra Forni Fork Mixers are available in 3 sizes, ranging from 35 kg (77 lbs.) to 80 kg (176 lbs.), and are the ideal mixer for any foodservice operation that specializes in softer, higher-hydration dough production. The shape of the mixing bowl and the fork allows the dough to become oxygenated quickly without causing heat from the friction of the mixing process. The forked mixer yields a final dough product that is superior in quality to that of other types of mixers by keeping the dough temperature lower resulting in greater development in the dough.

SPIRAL MIXERS

Better known as a "multi-purpose" mixer, Marra Forni Spiral Mixers are available in 3 sizes, ranging from 44 kg (98.8 lbs.) to 60kg (132 lbs.), and are the ideal dough mixer for commercial and non-commercial foodservice operations including pizzerias, restaurants, confectionaries and bakeries. Spiral Dough mixers reduce mixing time by half compared to traditional Fork Mixers. And, they are able to mix a variety of dough types with varying levels of hydration, while minimizing heat resulting from friction during the mixing process allowing for better development in the dough.
