Risch[®]
Menus & More Since 1935

OUR STORY

Risch Inc. was founded in 1935 by Hans Risch, an immigrant from Liechtenstein, who sought a better life for his family in Upstate New York. He began his journey in the menu cover business, printing and selling paper menus door-to-door, leaving an impression wherever he went.

Fast forward nearly a century and you will find a women-owned, women-led, 3rd and 4th generation employed business that remains thriving and true to its vision: helping all customers, no matter the size of industry, make beautiful, lasting first impressions to grow their brands and businesses.

Risch remains one of the top USA manufacturers within the restaurant and hospitality industries. Our quality and vision have continually been strengthened by expanding and adjusting our product lines to meet the ever-changing needs of our customers and industries we represent.

CUSTOMIZATION OPTIONS

We offer a vast selection of imprint options to help you create a custom look for your menu covers. While nearly all our products can have customized logos and prints, it's important to note that not every imprint option is viable on every product. To ensure the best results, all stamping and imprint options are clearly noted by product/collection.

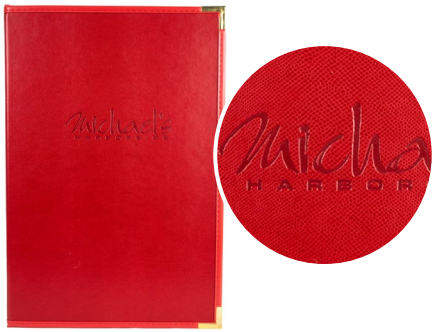

COLOR FOIL STAMP

Create a striking impression of your logo with our color foil stamping service. We use a metal die to apply your logo onto the product with a wide range of foil color options to choose from. This option is available for most products in our material bound collections.

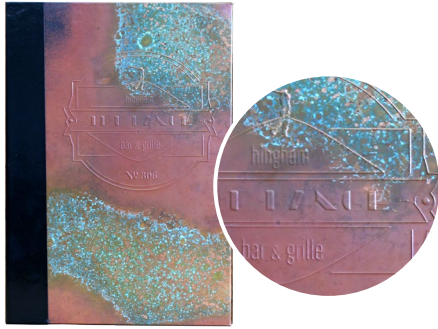

BLIND DEBOSS

For a sophisticated and subtle look, choose our blind debossing service. We use a metal die to recess your logo onto the product without the application of foil. This option is available for most products in our material bound collections.

BURNISH

Our burnishing service produces a branded, darkened, and recessed effect of your logo onto the product, without the use of foil. We use a metal die to create a lasting impression that adds a touch of elegance to your menu covers.

EMBOSSING

Our Patina Copper products can be customized with our embossing service. We use an inverted copper metal die to create a raised logo without the use of foil, giving your menu cover a distinct and unique look.

LASER ENGRAVING

Our wood products can be customized with our laser engraving service to engrave your logo directly into the wood. This option provides exceptional detail and is the only available option for our authentic wood products.

DIGITAL PRINTING

We offer full color digital printing for products that cannot be die stamped. Our products with digital print viability include the H2O, Waterproof Tear-Proof Menus, and chalkboard displays.

WANT TO LEARN MORE?

Scan the QR code to learn more about our customization options and artwork requirements for print.

COLOR FOIL STAMP OPTIONS

This process involves the fabrication of a metal die that imprints your logo into the product with the application of foil. We have a wide variety of foils available in nearly every color. Color foil stamp is available but not limited to most products in the material bound collections.
